

The logo for lemvia, featuring the brand name in a gold, serif font inside a dark, irregular oval shape. A delicate line drawing of a flower with long, thin petals and a central stem with leaves, positioned behind the lemvia logo.

Product Information

Massage Oil

100% Natural

Our Massage Oil delivers a revolutionary blend of natural ingredients for an elevated massage experience. Made with purely natural ingredients such as Jojoba Oil, Menthol, and Meadowfoam Oil that provides a deep tissue relaxing massage.

The effective, yet non-greasy formula absorbs into the skin and leaves no residue behind. It results in massage experience that relaxes your mind, soothes muscles and stimulates blood flow with its deep-muscle penetration formula.

Available with, or without CBD (Cannabidiol) infused.

- 
- A large, light blue, wavy-edged shape that serves as a background for the list of benefits.
- 
- A line drawing of a leaf with long, pointed lobes, positioned to the right of the blue wavy shape.
- Promotes blood flow
 - Balanced for perfect harmony with your body's natural pH
 - Deep tissue penetration
 - Promotes relaxation
 - Formulated for pain relief
 - Added slip to help with an even massage
 - Non-greasy
 - Non-comedogenic (will not clog your pores)
 - Non-medicated

Sensual: Natural gentle fragrance

CBD (Cannabidiol) - CBD is only infused into products clearly marked as such.

Specific Ingredient Focus

Why Arnica?

Arnica Montana Flower has been used for medicinal purposes since the 1500s and is still popular today. Arnica has been used to soothe muscle aches, reduce inflammation, and heal wounds.

Why Jojoba Oil?

Simmondsia Chinensis (Jojoba) Seed Oil has anti-inflammatory properties that help to tame skin chaffing and chapping. It reduces redness caused by drying, keeping the skin calm and comfortable.

The Vitamin E and B-complex in the Jojoba Oil help in skin repair and damage control. Jojoba is rich in vitamins and minerals that nourish the skin, including vitamin C, B and E, copper, and zinc.

Why Menthol?

Menthol provides a cooling sensation when applied to the skin, which helps relieve pain in the tissues underneath the skin. It is used to provide temporary relief of minor arthritis pain, backache, muscles or joint pain, or painful bruises.

Additionally, it reduces the production of inflammatory cytokines and prostaglandins to help improve red and inflamed skin.

Why CBD?

CBD (Cannabidiol) is a natural compound found in Cannabis plants. CBD is not impairing, meaning it does not cause a high. It is claimed that CBD improves blood flow.

The cannabinoids in CBD massage oil help to reduce inflammation and soothes muscles. This makes it very effective to provide relief from painful joints and muscles. People who suffer from chronic pain, arthritis, back pain, and so much more can reap the many benefits of a CBD oil massage.

CBD may have an anti-inflammatory effect on sebocytes, the skin cells that produce sebum. It helps to reduce inflammation. As an anti-inflammatory, CBD may be able to help reduce swelling, pain, and redness from existing breakouts, or irritation from skin conditions like eczema and psoriasis.

CBD is claimed to help with dry skin and other skin conditions, making it beneficial for your skin. In an article published on the USA Government's website National Library of Medicine dated 30 June 2021, it is stated that "preclinical evidence suggests topical application of CBD may be efficacious for some skin disorders, and inflammatory diseases".
