ROSE DAMASCENA HYDROSOL ORGANIC, CARTHAMUS TINCTORIUS (Safflower) SEED OIL, AQUA, CITRILLUS LANATUS, LIMNANTHES ALBA (Meadowfoam) SEED OIL, CETEARYL ALCOHOL, PEG-20 STEARATE, SODIUM BENZOATE, POTASSIUM SORBATE, NIACINAMIDE (Vitamin B3) 1.6g, MENTHOL 1.19g, MSM (Methylsulfonylmethane) 1.11g, GINKGO BILOBA LEAF EXTRACT 0.86g, YUCCA SCHIDIGERA EXTRACT 0.86g, PROPYLENE GLYCOL, WATER, CUCUMIS SATIVUS FRUIT EXTRACT 0.86g, GLYCERIN, CENTELLA ASIATICA EXTRACT 0.86g, PAPAIN 0.86g, CALENDULA MARIGOLD EXTRACT 0.86g, ALOE BARBADENSIS LEAF EXTRACT 0.86g, BUTYLENE GLYCOL, ANTHEMIS NOBILIS FLOWER EXTRACT 0.86g, GLYCERYL MONOSTEARATES, AESCULUS HIPPOCASTANUM 0.6g, GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE, PHENOXYETHANOL, MENTHA PIPERITA OIL 0.15g, CITRUS LIMON 0.15g

CBD (Cannabidiol) - CBD is only infused into products clearly marked as such.

Specific Ingredient Focus

Why Safflower Seed Oil?

Safflower Seed Oil provides pain relief, has anti-inflammatory and antioxidant benefits for the skin and is highly moisturising, helping the skin to retain moisture.

It lightens dark circles, dark spots, and other skin discolorations.

Why Kalahari Melon?

Kalahari Melon is rich in Essential Fatty Acids like omega 6 and 9. It plays a crucial role in maintaining the skin's barrier function, preventing moisture loss, and keeping the skin supple and hydrated.

It is packed with antioxidants, including vitamins A, C, and E that work together to neutralize free radicals, which help healing damage to skin cells. Its ability to provide deep hydration allows the oil to deliver moisture to the deeper layers.

Why Centalla Phytelene?

Centalla Phytelene contains a diverse array of phytochemicals, such as asiaticoside, madecassoside, asiatic acid, and madecassic acid. These compounds have been extensively studied for their potent antioxidant and anti-inflammatory properties, which play a crucial role in promoting skin health. It improves skin moisture by increase of skin surface hydration state and decrease in transepidermal water.

Why CBD?

CBD (Cannabidiol) is a natural compound found in Cannabis plants. CBD is not impairing, meaning it does not cause a high. It is claimed that CBD improves blood flow.

CBD may have an anti-inflammatory effect on sebocytes, the skin cells that produce sebum. It helps to reduce inflammation. As an anti-inflammatory, CBD may be able to help reduce swelling, pain, and redness from existing breakouts, or irritation from skin conditions like eczema and psoriasis. CBD may help reduce various types of acne thanks to its ability to adjust how the body creates sebum.

CBD is claimed to help with dry skin and other skin conditions, making it beneficial for your skin. In an article published on the USA Government's website National Library of Medicine dated 30 June 2021, it is stated that "preclinical evidence suggests topical application of CBD may be efficacious for some skin disorders, and inflammatory diseases".
