Product Information

Leave-in Conditioner

100% Natural

Our purely natural Leave-in Conditioner moisturises your hair without weighing it down, adding slip to make detangling easier. It feeds, strengthens, and protects your hair. It makes your hair easier to manage as you don't have to rinse it out, allowing you to go about your everyday activities with ease.

Specially formulated to hydrate your hair, improve its elasticity, and prevent breakage during detangling. It lowers frizz, enhances shine, and will help to repair damage already done to your hair.

Available with, or without CBD (Cannabidiol) infused.

- Sulphate-free
- Balanced for perfect harmony with your hair's natural pH
- Promotes hair growth
- Adds slip to help with detangling
- Ultra-hydrating and locks in moisture
- Adds shine and smoothness
- Strengthens hair and reduces breakage
- Gentle enough for regular use
- Paraben-free
- Natural sensual fragrance

TREATED HAIR - Keratin (Protein) added.

CBD (Cannabidiol) - CBD is only infused into products clearly marked as such.

Specific Ingredient Focus

Why Safflower Oil?

Carthamus Tinctorius (Safflower) Seed Oil has been used for many ailments, including baldness and hair loss. The main chemical compounds of Safflower Oil are Oleic, Linoleic, Palmitic, Stearic, Linolenic, and Palmitoleic acids. Oleic Acids (OMEGA-9) maintain the softness, suppleness, and radiance of hair. It stimulates the growth of thicker, longer, and stronger hair.

Why Alkane?

Alkane is used to enhance spread and deliver a soft after feel, without weighing tresses down. Alkane softens, protects and conditions, but with a much lighter and dry feeling. It provides better volume and frizz control and has been shown to improve the hair's condition by providing moisturization and improved barrier function.

Why D-Panthenol?

D-Panthenol has moisturizing properties that improves the elasticity of the hair strands, preventing breakage.

It makes hair look healthy and vibrant.

D-Panthenol forms a thin protective layer on the surface of the hair strands, thereby making it look shiny and radiant.

Why CBD?

CBD (Cannabidiol) is a natural compound found in Cannabis plants. CBD is not impairing, meaning it does not cause a high. It is claimed that CBD improves blood flow and hair growth.

In an article published on the USA Government's website National Library of Medicine dated 30 June 2021, it is stated that "Moreover, CBD treatment regulates proliferation via activation of CB1 receptor of keratinocytes in hair follicles" and "There are some reports that CBD can promote the growth of the hair. CBD oil contains high concentration of vitamin E, which can stimulate hair growth and help improvement of alopecia." (baldness.)

CBD is claimed to help with dry skin and other skin conditions, making it beneficial for your scalp. In the same article above, it is stated that "preclinical evidence
